DESCRIPTION OF THE ITEM

GARLIC

DIETARY SUPPLEMENTS

Garlic is one of the most often studied herbs in the world. Its wondrous effects were known in ancient times, and today we know that garlic has a beneficial impact on the respiratory and immune systems. Nature's Sunshine's Garlic is dehydrated in a strictly controlled environment as to preserve the enzymes and other heat-sensitive compounds that are responsible for many of its nutritional benefits when fresh. Garlic supports the body's own defence system, balances blood sugar levels and improves the weakened insulin activity. Garlic also helps maintain recommended cholesterol levels and supports vascular health. It should also be noted that garlic, among other advantages, helps maintain a healthy liver and contributes to temporary stress resistance.

Garlic helps maintain a healthy liver.

Garlic ensures proper cholesterol and blood sugar levels.

A diet rich in garlic supports the immune system.
