DESCRIPTION OF THE ITEM

ALOE VERA JUICE

DIETARY SUPPLEMENTS

In case of Aloe Vera Juice, the production process plays a key role. Aloe vera can lose its beneficial properties very easily during processing, which is why at Nature's Sunshine we process it as little as possible. Each aloe vera leaf is cut, and then the bitter outer part of the leaf is removed. Only the gel remains after this procedure, which after a few minutes turns into liquid. At Nature's Sunshine, nothing but the liquid is processed. Aloe vera (*Aloe barbadensis* Mill) reduces fatigue and improves metabolism and immunity. It also nourishes the digestive tract, improves digestion and contributes to regular bowel movements. Aloe vera also helps improve glycemic control, maintain proper blood sugar levels and stimulate insulin release.

- Aloe Vera Juice contributes to maintaining proper blood sugar levels.

- It improves digestion and supports regular bowel movements.

INGREDIENTS:

Purified water; aloe vera gel; acidity regulator: citric acid; preservatives: potassium sorbate, sodium benzoate

KEY INGREDIENTS:

Content in the recommended serving (180 ml):
